PARUL MANUJA

Java / J2EE Developer | Enterprise Application Engineering

Gurgaon, Haryana | +91 97165 69714 | parulmanuja16@gmail.com

PROFESSIONAL SUMMARY

Java/J2EE professional with 15 years of experience across banking and retail domains, covering requirements analysis, design, development, production deployment, troubleshooting, peer reviews, and technical training. Strong background in Spring, Hibernate, Oracle, Ext JS, Jenkins, Git/SVN, JIRA, and enterprise SDLC delivery. Experienced in translating high-level requirements into maintainable solutions and supporting applications across Dev, SIT, UAT, and Production environments.

TECHNICAL SKILLS

CORE STRENGTHS

Requirements analysis • Solution development • Root-cause analysis • Code and peer reviews • Release delivery • Production support • Technical training • Stakeholder communication

PROFESSIONAL EXPERIENCE

Java & Ext JS/Angular Developer | Project: eRecon | Client: Citi Bank

Environment: Java, J2EE, Spring, Hibernate, Ext JS 4, Angular 16 Oracle, JasperReports, Eclipse, SQL Developer, Git/SVN, Jenkins, RLM, JIRA

Translated high-level requirements into business and technical documentation and delivered solutions aligned with release milestones.

Migrate UI from EXTJS framework to Angular framework.

Migrated Talend jobs to Spring boot jars.

Taking care of remediating CVMP issues and vulnerabilities

Developed, maintained, enhanced, troubleshot, and documented reusable application components using object-oriented design principles.

Conducted peer and lead reviews, provided actionable feedback, and supported quality-focused delivery.

Managed enhancements and defects in JIRA, including root-cause analysis and resolution tracking.

Deployed application releases across Dev, SIT, UAT, and Production environments using RLM and Jenkins.

Created reports using JasperReports and iReport and collaborated with cross-functional stakeholders.

Java & Ext JS Developer | Project: eRecon | Client: Citi Bank

Environment: Java, J2EE, Spring, Hibernate, Ext JS 4, Oracle, JasperReports, Eclipse, SQL Developer, SVN, Jenkins, RLM, JIRA

Translated high-level requirements into business and technical documentation and delivered solutions aligned with release milestones.

Developed, maintained, enhanced, troubleshot, and documented reusable application components using object-oriented design principles.

Conducted peer and lead reviews, provided actionable feedback, and supported quality-focused delivery.

Managed enhancements and defects in JIRA, ncluding root-cause analysis and resolution tracking.

Deployed application releases across Dev, SIT, UAT, and Production environments using RLM and Jenkins.

Prepared JasperReports-based outputs with iReport and supported enterprise release activities.

Java Developer | Project: Floor Planning Express | Client: Walgreens

Environment: Java, J2EE, Spring, Ext JS 4, Ajax, JSON, SQL, RAD 7, SQL Developer, CVS

Collaborated with designers to build intuitive, cross-browser interfaces for store and district users, including iPad-compatible workflows.

Converted high-level requirements into Business Requirement Documents and Functional Requirement Documents.

Developed graphical floor-plan capabilities integrating multiple data sources using Java/J2EE, Spring, Ext JS, Ajax, JSON, and SQL.

Estimated module-level effort, performed peer and lead reviews, and provided detailed weekly delivery reports.

Developed and maintained reusable components while troubleshooting defects and documenting design-aligned solutions.

AWARDS & LEADERSHIP

Received TCS 'On the Spot' award for performance.

Contributed to multiple TCS 'Best Team' awards for defect-free delivery.

Received Incedo 'Make a Difference' award for client appreciation.

Conducted technical training sessions on Java and Ext JS.

CERTIFICATIONS

Oracle Certified Web Component Developer 5.0, 2014

Oracle Certified Java Programmer (OCJP), Java 1.6, 2013

EDUCATION

B.Tech, Information Technology | YMCA University of Science and Technology, Faridabad | 2011

Secured second position in the first and second semester examinations.

Note: The Modern Java Upskilling line is intentionally labeled as learning-focused. Retain only the technologies you can discuss confidently in interviews or have used in hands-on projects.
